### Introduction

Madison County is located in the southwestern portion of Illinois and is a part of the St. Louis Missouri/Illinois metropolitan area. The County ranks as the eighth largest in the State, with a 2010 population of 269,282. It contains approximately 724 square miles of territory, with a total of 28 municipalities and 24 townships. In 2010, approximately 212,290 residents resided within the boundaries of the municipalities and 56,992 lived in the unincorporated area of the County.

Madison County Government was organized in 1812, when the County was first created. Since that time, the geographic size of the County has decreased to its present area and the government has evolved into its present organization, which is outlined in the attached organizational chart. This includes eleven Elected Officeholders, the County Board and the Offices of the Third Judicial Circuit Court. The individual parts of the organization are responsible for delivering a wide variety of services to the public through 39 departments, under the oversight of the County Board and the Elected Officeholders.

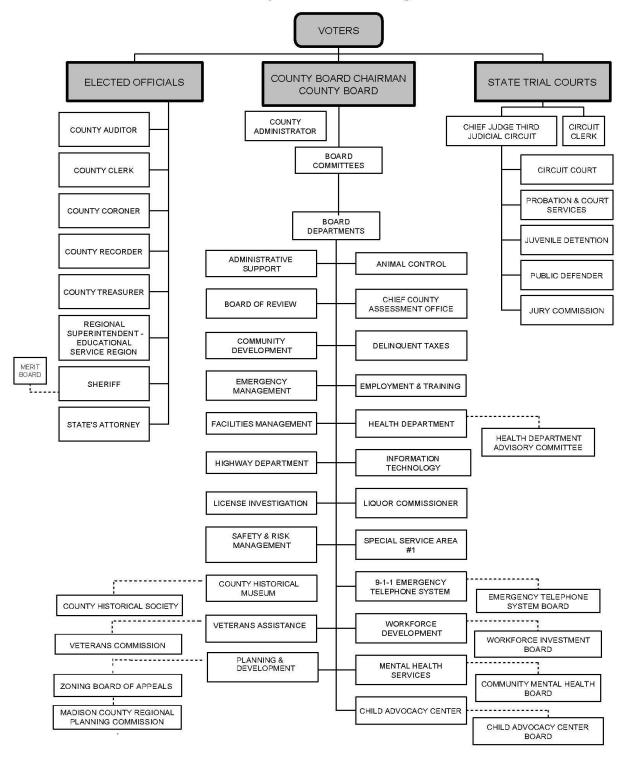

The County Board is comprised of 29 district representatives who are elected on a partisan basis from 29 board districts. The Chairman of the County Board is elected by the voters of Madison County and is responsible for the overall management of all departments under the jurisdiction of the County Board and for the implementation of the Board's policies. The Board is organized into 15 committees, each of which is responsible for overseeing certain areas of the County Government.

One of the main functions of the Madison County Board is to make and adopt a budget to plan for and control the expenditure of tax monies used to deliver the various County services. This document is intended to provide a summary and overview of that budget. The information presented in Section 1 shows a recap of the overall budget by the six broad fund categories. Section 2 contains the summaries of the individual budgets by department and functional area. Line item budgets, which are prepared to further break down the budget amounts contained in Section 2, are available for review in the County Board Office.

The various services provided through the budgets described in this document are paid for with monies from several funds established by State Statute and/or County Board action. Section 3 presents revenue estimates for the proposed budget. Section 4 provides information concerning the revenue sources for each of the funds and the functions each fund supports.

### FY 2018 Madison County Budget Policies

- The County Budget for the General Fund and all Special Tax Funds shall be prepared to insure that expenditures equal projected revenues. Monies from the ending balances in the various funds may be used to augment projected revenues where it is determined to be prudent to do so to minimize the property tax levy and maintain an adequate level of working cash.
- All reasonable steps will be taken to insure that the overall County property tax levy shall be kept as low as possible. Abatement of property tax levies shall be considered whenever it is determined to be fiscally responsible to do so.
- 3. Planning for the FY 2018 Budget will be aimed at maintaining the cash balance in the General Fund at a level sufficient to pay for not less than four months operating expenditures.
- 4. In developing recommendations for the utilization of General Fund revenue both present and future tax rates, fund balances, expenditure rates and alternate revenue sources will be considered to insure that a prudent approach is taken to fund county operations over the long-run.
- A separate Capital Outlay Budget Component will be prepared. General Fund monies may be allocated to fund the capital outlay budget within the constraints of the availability of funds. All County Departments shall be eligible to make documented requests for capital outlay funds.
- 6. The County will continue to explore opportunities for intergovernmental agreements with other governmental units which provide for cost effective methods of providing public services and will consider participating in those which provide for an equitable distribution of costs to those citizens receiving the services.
- 7. User fees that insure that those individuals who receive services bear the cost of providing them will be implemented where appropriate.
- 8. Each department will be asked to prepare a five-year capital project priority list. The projects to be considered as part of the long range capital project priority list are those that involve major expenditures for improvements to buildings, equipment, facilities, sewer lines, lift stations, roads, bridges and other infrastructure items. Such project priority lists will be analyzed to support long range planning for the financing of such projects deemed necessary.
- 9. A Zero Base Budget Process will be utilized under which each County Department will be asked to explain the total cost of operating each of the service areas under their control, including the number of employee positions needed. Each Department will also be asked to identify funds within their budgets that can be eliminated without reducing essential services. Available funds will be allocated in accordance with the County's priorities, anticipated revenues and available fund balances.
- 10. Conditions for adding programs or staff: No programs or services will be established or expanded by any department, nor shall any new positions be created during FY 2018 unless one of the following situations exists:

- a) It is determined that such new or expanded programs or services are beneficial to the public and generate sufficient income to offset the actual cost thereof; or,
- b) The cost-benefit of such new or expanded programs or services is sufficient over the long run to be worthy of implementation; or,
- c) Such programs or services are required and/or funded the by State or Federal Governments. If such programs or services are so mandated or funded after the adoption of the FY 2018 Budget, such programs or services shall be reviewed and, if approved, funded by an emergency appropriation.
- 11. No vehicles shall be added to any Department fleet and no replacement vehicles will be purchased unless the purchase is justified under the provisions of Item # 10 above. The use of all county-owned vehicles by county employees shall be governed by policies adopted by the County Board.
- 12. Budget forms and instructions for completing them will be provided to all Departments. All Departments shall adhere to the target dates as indicated in the Budget Schedule for FY 2018.
- 13. Once the FY 2018 budget is adopted, the County Board Chairman and Finance and Government Operations Committee shall monitor expenditure rates with respect to the total budget amounts for each Department Budget. The responsibility for monitoring line item budget expenditures shall rest with the Department Head or Elected Official; provided that the total authorized budget amount shall not be exceeded.
- 14. If unspent funds remain in a department's budget at the end of the fiscal year, the Department Head or Elected Official may request that up to one-half of the unspent amounts be approved for a one-time expenditure that will improve the department's ability to provide services. Such requests will be analyzed to determine what impact having unspent funds should have on budget levels for future years. The County Board Chairman and Finance and Government Operations Committee shall recommend which requests should be approved. The County Board will be asked to add funds to pay for such one-time expenditures to the subsequent fiscal year's budget.
- 15. All building related expenditures from the General Fund shall be made through the Facilities Management Budget. All expenditures for building related projects or improvements from Special Funds shall be coordinated by the Facilities Management Committee. The Facilities Management Department will develop procedures for working with other County departments who are responsible for the maintenance of buildings and property to coordinate expenditures and necessary services.

### Section 3 - Individual Department Budget Summaries

The following section provides information for each of the County's individual operating budgets. The information includes the title, account number, responsible official, a brief mission statement explaining the activities supported by the budget, the fund from which the budget's resources are drawn. The County Auditor maintains a line item budget breakdown for each of these budgets under the County's accounting system. Information concerning the line item budgets is available from either the County Auditor's Office or the County Board Office.

# Section 4 - FY 2018: Estimated County Revenue

This section provides projected revenue for both the current and the next fiscal year. The revenue is presented in individual fund format. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Section 4 provides a more detailed listing of each County Fund, its sources of revenues, and expenditures from each fund.

Finance Committee approved Oct 30, 2017. Posted to County website Oct 31, 2017. Approved by Board Members Nov 15, 2017.

# FY 2018 General Fund Revenue

# FY 2018 Total County Revenue

# Section 5 - Fund Descriptions

The operations of Madison County Government are funded through a wide variety of revenue sources. Some of these are general taxes or fees that are deposited in a General Fund that supports the basic operations of the government. Others are specific taxes, fees or intergovernmental transfers that are received to support specific functions. These specific revenues are deposited in special revenue funds that are only used to support the functions for which they were created. The following section lists the revenue sources by fund and the functions, which they support.

#### **General Fund**

The General Fund is the main operating fund of County Government. It provides the resources to carry out the majority of the activities that the County undertakes to provide general government services to its residents. The funds in the General Fund may be used for a lawful purpose for which the County Board chooses to use them, including for specific services otherwise funded with monies from special revenue funds. In most cases, the monies in the Special Revenue Funds may not be transferred to the General Fund.

### Special Revenue and Other Funds

Special Revenue Funds are established either by specific legislation or by action by the County Board under authority granted by State statute. Each fund has a specific purpose and the monies which flow into a fund are restricted to expenditures related to the purposes for which the fund was established. In general, monies in Special Revenue Funds may not be used for General Fund purposes; but General Fund monies may be transferred to Special Revenue Funds.

# Section 6 – Capital Project Plan

As part of the annual budget process, each department is asked to prepare a five-year capital project priority list. The projects included are part of the long range capital project planning process that includes major expenditures for improvements to buildings, equipment, facilities, sewer lines, lift stations, roads, bridges other infrastructure items, as well as information technology equipment. Such project priority lists are analyzed to support long range planning for the financing of such projects, as deemed necessary. The five-year plan is a roadmap that provides guidance for the County Board in planning for and budgeting for capital projects in the future.

Madison County maintains a Capital Project Fund where funds are transferred from the General Fund and accumulated for the purpose of making specified capital improvements, repairs, or replacement with respect to real property or equipment, or other tangible personal property of the county. Expenditures from the Fund are required to be budgeted in the fiscal year in which the capital improvement, repair, or replacement will occur. For large projects, budgeting will sometimes occur over multiple years. When the county board determines that surplus moneys not needed for any capital improvement, repair, or replacement project remain in the Fund, those surplus moneys are transferred back to the General Fund.

The Capital Project Plan includes some projects funded by Special Revenue Funds. These projects are restricted and the funds may only be used for the purposes set forth in statute, grant agreement, or county ordinance.

The below tables accounts for proposed future capital projects.

The table below lists the projects that are proposed in Fiscal Year 2018:
